## ABOUT ME

---

I am a self-motivated person who likes continuous learning. Having completed The School of Code Bootcamp, I am now a confident Software Developer, looking to further my growth in a professional environment.

From previous employment, I have developed my soft skills in communication, teamwork, time management, and adaptability, which I believe will make me an asset to any team.

## DIGITAL SKILLS

---

HTML5/CSS, Javascript / RESTful api / NodeJS, ExpressJS, ReactJS / Github / PostgreSQL / Postman / Deployment with Netlify, Vercel / Wordpress / AWS Cloud Practitioner / SEO

## SELF LEARNING

---

### FreeCodeCamp

[ 05/2022 – Current ]

Since finishing School of Code Bootcamp, I am currently undergoing my self-paced learning on FreeCodeCamp, Udemy, and CS50's Introduction to Computer Science from Harvard University.

## WORK EXPERIENCE

---

### Software Developer

*School of Code* [ 11/2021 – 03/2022 ]

Chosen from nearly 1,800 applicants I attended a 16-week intensive full-time Full Stack Developer Bootcamp. School of Code opened to me the door to a new, exciting world of problem-solving and creativity.

During my training, I learned principles of software development, algorithmic problem solving, as well as, the importance of team working through collaboration and pair programming. Initially, I learned to program with HTML, Vanilla JavaScript, and CSS and then moved on to developing with NodeJS, ExpressJS, ReactJS, NextJS frameworks, and databases such as PostgreSQL and MongoDB. Implementing unit tests, integration tests, and end-to-end tests.

My first collaborative project was the development of the "**Rock, Paper, Scissors**" game using Vanilla JavaScript. Here is a link to the game:

[https://github.com/SchoolOfCode/w1d5\\_rock-paper-scissors-hackathon-room-35](https://github.com/SchoolOfCode/w1d5_rock-paper-scissors-hackathon-room-35).

During our project week, we created the application of a random generator of energizers, reminders, and inspirational quotes to combat imposter Syndrome, fatigue, and a sedentary lifestyle. We used ExpressJS, PostgreSQL, and Heroku Postgres to create our back-end, and store and access our data. During this project, my contribution was on implementing our front end using ReactJS and explore best practices for the app deployment. Our developed work can be found with those links:

<https://github.com/IngaSafranova/national-project-week-repo-2-zero-to-heroes-tair>,

<https://github.com/SchoolOfCode/national-project-week-zero-to-heroes-tair>

For our final 4 week project, as a team of five members, we created a social media site for coders. Our plan and working process followed AGILE methodologies. We used the Miro board for our ideation and research process, and also for our user personas. We used the Exalidraw whiteboard tool and Figma for our low and high-fidelity wireframes. To plan, assign sprints, and track our progress we used Jira software, for daily team retrospectives we used the Metroretro tool. During the planning period, I undertook a research process and created user personas. When we started programming we worked in teams of three or two and worked on all aspects of the

codebase during the period of three weeks. We developed the app in NextJS (TypeScript) and utilized Mongoose to interact with the MongoDB Cloud cluster. For real-time chat features we incorporated the WebSocket Socket.io library.

During the final project, I was faced with several challenges, from working asynchronously in collaboration with my team to learning new technologies. All those challenges were overcome through teamwork, support for each other, and dedication.

Here is the link to our project: <https://github.com/The-Hackstreet-Boys/Codebook>.

## **Waitress**

**Hyatt Regency** [ 05/2013 – 08/2015 ]

City: Birmingham

Country: United Kingdom

While working at Hyatt Regency Hotel my main responsibilities were to ensure high standards of customer service, training of new colleagues, maintain queries and complaints procedures, reconcile the cash register at the end of the shift, and collaborate with other departments.

## **Duty Manager**

**Hibernian Hotel** [ 03/2002 – 10/2012 ]

City: Mallow, co. Cork

Country: Ireland

My main duties were to supervise the day-to-day operations of all hotel departments. Control costs through daily coordination of staff rota, purchasing, and waste management. Increase sales through quality and speed of services. Reconcile the cash registers at the end of the shift. Maintain queries and complaints procedures.

## **EDUCATION AND TRAINING**

---

### **Bachelor of Professional Studies (Hotel and Restaurant Management)**

**University of Applied Sciences** [ 08/1996 – 07/1999 ]

City: Vilnius

Country: Lithuania

## **LANGUAGE SKILLS**

---

Mother tongue(s): **Lithuanian**

Other language(s):

### **English**

**LISTENING C2 READING C2 WRITING C1**

**SPOKEN PRODUCTION C2 SPOKEN INTERACTION C1**

### **Russian**

**LISTENING C2 READING C1**

**SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2**

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*

---
